

SET YOUR COURSE FOR THERMAL ACOUSTIC CONTROL

On the water, there's no escaping shipboard noise. But advanced acoustic materials from Aearo Technologies LLC can help control it at the source. We offer a wide-ranging portfolio of solutions to control structural vibration, engine noise and even wave slap, plus thermal barriers for hot-running components. With these materials on board, you can equip your craft to beat the heat – and tone down the sound – so passengers can cruise and anchor in comfort.

Warranty and Limited Remedy: Aearo Technologies LLC warrants that each Aearo Technologies LLC product meets the applicable Aearo Technologies LLC product specification at the time Aearo Technologies LLC ships the product. Aearo Technologies LLC MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS, INCLUDING ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. If the Aearo Technologies LLC product does not conform to this warranty, the sole and exclusive remedy is, at Aearo Technologies LLC's option, replacement of the Aearo Technologies LLC product or refund of the purchase price.

Limitation of Liability: Except where prohibited by law, Aearo Technologies LLC will not be liable for any loss or damage arising from the Aearo Technologies LLC product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted.

STRUCTUREBONE DAMPING TO CONTROL VIBRATIONAL ENERGY

Boatbuilders face challenging design problems when working to control structureborne vibration. Our high-performing extensional and constrained layer damping materials are available to control both hydrodynamic and mechanically induced structural vibrations that transfer into the hull structure from the engine room or wave slap.

Structureborne Damping Materials

- HMD Tiles
- ISODAMP™ C-1002
- ISODAMP™ C-2003

AIRBORNE NOISE RADIATING FROM MECHANICAL EQUIPMENT

Airborne noise is radiated directly from the engines and impacts the surfaces within the engine room and passenger compartments. Foam barrier composites are especially suited for blocking engine room noise from being transmitted to adjacent passenger areas, and faced foam and fiber materials help absorb the noise inside the engine compartment.

Acoustic Materials

- TUF-COTE™ Acoustic Foams
- 3M™ Thinsulate™ Insulation

Barrier Composites

- Weighted Barrier

THERMAL BARRIERS TO PROTECT COMPONENTS

Engine compartments and exhaust systems generate a tremendous amount of heat that can potentially damage surrounding components or transfer into passenger areas. Thermal barriers block and absorb heat from escaping into non-controlled areas, helping protect electronic materials and people from high heat sources.

- TUFshield™ Thermal Barrier

ADDITIONAL MATERIAL HIGHLIGHTS

Isolators – Instruments and gauges can be shock mounted using energy-absorbing grommets and isolators.

Aluminized Tape – Aluminized tape for sealing foam with an aluminized facing helps protect from outside elements.

Technical Information

The data listed in this data sheet are typical or average values based on tests conducted by independent laboratories or by the manufacturer. They are indicative only of the results obtained in such tests and should not be considered as guaranteed maximums or minimums. Materials must be tested under actual service to determine their suitability for a particular purpose.

Warranty, Limited Remedy, and Disclaimer

Unless an additional warranty is specifically stated on the applicable Aearo Technologies product packaging or product literature, Aearo Technologies warrants that each Aearo Technologies product meets the applicable Aearo Technologies product specification at the time Aearo Technologies ships the product. Aearo Technologies MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. If the Aearo Technologies product does not conform to this warranty, then the sole and exclusive remedy is, at Aearo Technologies's option, replacement of the Aearo Technologies product or refund of the purchase price.

Limitation of Liability

Except where prohibited by law, Aearo Technologies will not be liable for any loss or damage arising from the Aearo Technologies product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.
